PART ONE: BEING A GOOD DOCTOR **1**

01 Good medical practice in a changing environment: a consumer perspective	2
02 On being a good doctor: the changing face of medical professionalism	7
Introduction	7
2.1 Medical professionalism	7
2.2 Doctors as advocates and stewards	11
2.3 Medicine: a science and an art	12
Summary	13
03 Ethical principles for the medical profession	16
Introduction	16
3.1 Ethics and law	18
3.2 Ethics and emotions	18
3.3 Elements of ethical practice	19
3.4 Types of ethical issues in medicine	20
3.5 Ethical principles for medical practice	21
3.6 Beneficence	22
3.7 A process for ethical decision making	27
Summary	29
04 Ethical and legal responsibilities of medical students	30
Introduction	30
4.1 Objectives of Australian and New Zealand medical programs	31
4.2 Registration of medical students	32
4.3 Ethics and professionalism for students	33
4.4 The student and the healthcare team	39
4.5 Student health	39
4.6 Responsibilities of, and professional ethics for, medical teachers and supervisors	41
Summary	42
05 Communication in clinical practice	46
Introduction	46
5.1 Key skills for effective communication in medical practice	47
5.2 Challenges to effective communication	50

5.3	Appreciating psychosocial factors in patients seeking medical help	52
5.4	The physical examination	52
5.5	Important aspects of patient education, follow-up and concluding consultations	53
5.6	Shared decision making	54
5.7	Working with interpreters	54
5.8	Cultural safety	56
5.9	Communication for technology-based consultations	56
5.10	Communicating when things go wrong	57
5.11	Dealing with strong emotions	58
5.12	Coping with challenging patient–doctor encounters	58
5.13	Medicolegal examinations	59
5.14	Consideration of touch as a means of non-verbal support and empathy	59
5.15	Sensitive topics including talking about sex, gender and sexuality	59
5.16	Talking about death and dying	60
5.17	Doctors and other health professionals as patients	61
5.18	Ending a doctor–patient relationship	61
5.19	The importance of written communication	62
5.20	Intra- and interprofessional communication and relationships	62
5.21	Feedback to and from colleagues	63
5.22	Communicating on social media	64
	Summary	65
06	Confidentiality, privacy and disclosure	70
	Introduction	70
6.1	Confidentiality distinguished from privacy	70
6.2	The legal basis of privacy	72
6.3	The Australian Privacy Principles	74
6.4	Notifying data breaches	79
6.5	Enforcement and regulatory action	79
6.6	Specific situations	79
	Summary	82
07	Consent and informed decision making	85
	Introduction	85
7.1	The ethical, legal and professional requirements for consent	85
7.2	Elements of the informed decision-making process	87
7.3	Specific situations	92
7.4	Treatment without consent	94
7.5	Informed financial consent	95
	Summary	95
08	Sexual and other professional boundaries: being a doctor in modern society	97
	Introduction	97
8.1	The role of the doctor in today’s society and the importance of professional boundaries	98
8.2	Types of boundary breaches with patients	98
8.3	Risk factors for boundary breaches	101
8.4	Relationships with colleagues and trainees	102

8.5	Social media and digital communication	103
8.6	Regulatory aspects of boundary breaches	103
	Summary	104
09	Doctors, industry and conflicts of interest	107
	Introduction	107
9.1	How industry interacts with doctors	108
9.2	Influence and conflict of interest	109
9.3	Response to public concerns	112
9.4	Management of influence and conflicts of interest	113
	Summary	115
10	Continuing professional development	119
	Introduction	119
10.1	Continuing professional development requirements for ongoing registration as a medical practitioner	119
10.2	Professional development outside the medical profession	120
10.3	Professional development within the medical profession	121
10.4	Elements of effective continuing professional development for doctors	124
	Summary	128
11	The doctor and interprofessional relationships	131
	Introduction	131
11.1	The legal and ethical context	133
11.2	Nurses and midwives	133
11.3	Pharmacists	136
11.4	Aboriginal and/or Torres Strait Islander health workers and practitioners	140
11.5	Audiologists	141
11.6	Dental practitioners	141
11.7	Dietitians and nutritionists	142
11.8	Exercise physiologists	142
11.9	Medical radiation practitioners	143
11.10	Occupational therapists	143
11.11	Optometrists	144
11.12	Orthotists/prosthetists	144
11.13	Paramedics	145
11.14	Physiotherapists	146
11.15	Podiatrists	146
11.16	Psychologists	147
11.17	Social workers	147
11.18	Speech pathologists	148
11.19	Chaplains and spiritual care practitioners	148
11.20	Interpreters	149
11.21	Lawyers	150
11.22	Health librarians	150
11.23	Police	151
11.24	Complementary medicine practitioners	151
	Summary	154

12	Personal health of the doctor: illness and impairment	159
	Introduction	159
	12.1 Defining doctors' health	160
	12.2 Doctors' health and the delivery of health care	161
	12.3 Impacts of the medical profession on doctors' health	162
	12.4 How personal attributes and the medical career intersect	165
	12.5 A reflection on suicide	166
	12.6 The medical student and doctor-in-training experience	168
	12.7 Peer support and social connectedness	169
	12.8 Caring for yourself as a doctor	170
	12.9 Seeking independent care as a doctor-patient	171
	12.10 Being a treating doctor and caring for the doctor-patient	174
	12.11 Impairment, and why this matters to all doctors	176
	12.12 Health conditions that may impair safe practice	178
	12.13 Resources and support	179
	Summary	181

PART TWO: SUPPORTING INDIVIDUALS, GROUPS AND COMMUNITIES **185**

13	Infertility and assisted reproductive treatment	186
	Introduction	186
	13.1 What is assisted reproductive treatment?	186
	13.2 Regulation of assisted reproductive treatment in Australia	187
	13.3 Clinical practice points when caring for patients with infertility	191
	Summary	194
14	Termination of pregnancy and related issues	196
	Introduction	196
	14.1 The current legal framework for termination of pregnancy	196
	14.2 Terminations of pregnancy for children and young people	201
	14.3 Methods for terminating pregnancy	201
	14.4 Ethical considerations in relation to late-term terminations	201
	Summary	202
15	Family violence, child maltreatment and elder abuse	203
	Introduction	203
	15.1 What are family and domestic violence, child maltreatment and elder abuse?	203
	15.2 Identifying family violence, child maltreatment and elder abuse	206
	15.3 Responding to a disclosure of suspected violence or abuse	213
	15.4 Legal obligations	216
	15.5 Regulatory attitudes towards doctors as perpetrators of family and domestic violence or abuse of children or older persons	220
	Summary	224
16	Achieving full health potential: health equity	226
	Introduction	226
	16.1 The rationale for equity	226

16.2	Inequity in Australia	227
16.3	Mechanisms of health inequity	227
16.4	The social determinants of health	227
16.5	The elements of health equity	229
16.6	Contributing to health equity: what doctors can do	234
	Summary	237
17	Culturally safe health care for Aboriginal and/or Torres Strait Islander peoples	244
	Introduction	244
17.1	Cultural safety: an introduction	244
17.2	The Australian policy context	246
17.3	Tools for measuring cultural safety	247
17.4	Understanding cultural safety for Aboriginal and/or Torres Strait Islander people	248
17.5	Nested cultural safety: a systems approach	252
17.6	Cultural safety in practice	256
	Summary	264
18	People with mental illness and the law	269
	Introduction	269
18.1	Definition of mental illness	270
18.2	Voluntary admission	271
18.3	Involuntary admission	271
18.4	Community treatment orders	275
18.5	Patients in the forensic mental health system	276
18.6	Electroconvulsive therapy and other restricted or prohibited treatments	276
18.7	Use of seclusion and restraint	276
18.8	Consent to non-psychiatric treatment	277
18.9	State-based resources to assist medical practitioners	277
	Summary	277
19	Advance care planning and end-of-life care	279
	Introduction	279
19.1	Dealing with death as the normal end to every life	281
19.2	Decision making for care at the end of life	286
19.3	Documentation: advance care planning, advance care directives and the law	293
19.4	When cure or life prolongation is becoming impossible	300
19.5	End-of-life care: a 'good death'	300
19.6	Provision of palliative care	301
19.7	Care of children at the end of life	303
19.8	Making decisions for patients with post-coma unresponsiveness	307
19.9	Voluntary assisted dying	307
19.10	Supporting the dying person and their family around the time of death	311
19.11	Communication and confidentiality after death	312
19.12	Providing support in bereavement	313
19.13	Triage and resource-allocation decision making in pandemics and other disasters	313
	Summary	314

20	The Australian healthcare system	320
	Introduction	320
	20.1 Functional levels: primary, secondary and tertiary care	320
	20.2 Government responsibilities	322
	20.3 Australian Government funding schemes	323
	20.4 Doctors' employment	328
	20.5 Organisations and programs to support medical practice	329
	20.6 Medical education and training in Australia	332
	20.7 Regulation of medical practice	334
	Summary	334
21	Regulation of the medical profession	336
	Introduction	336
	21.1 National Registration and Accreditation Scheme	336
	21.2 Roles of organisations within the national regulatory system	337
	21.3 Co-regulatory jurisdictions	339
	21.4 Registration	340
	21.5 Notifications of concern (complaints)	342
	Summary	347
22	Healthcare complaints and complaint systems	349
	Introduction	349
	22.1 The right to complain	349
	22.2 Benefits of complaints and feedback	350
	22.3 Health complaints agencies in Australia	353
	22.4 The nature of complaints	357
	22.5 Management of complaints by health complaints agencies	360
	Summary	363
23	Patient safety	365
	Introduction	365
	23.1 Background	365
	23.2 Factors contributing to patient harm	366
	23.3 Improving patient safety by reducing harm during health care	368
	Summary	370
24	Resource allocation and rationing in health care	373
	Introduction	373
	24.1 Ethical considerations	374
	24.2 Where resource allocation decisions are made	376
	24.3 The doctor and resource allocation	377
	24.4 Approaches taken to resource allocation and rationing	379
	24.5 The law and resource allocation	381
	Summary	381

25	Medical negligence and professional liability	384
	Introduction.....	384
	25.1 Actions for negligence against medical practitioners.....	384
	25.2 Duty of care.....	385
	25.3 Negligence in care and treatment.....	390
	25.4 Negligence in consent.....	394
	25.5 Quantum: assessment of damages.....	396
	25.6 Expert reports.....	397
	25.7 Criminal negligence and manslaughter.....	398
	25.8 Risk management and preventing claims for negligence.....	398
	Summary.....	400
26	Medicolegal examinations and reports, court procedures and expert evidence	402
	Introduction.....	402
	26.1 Medicolegal reports.....	402
	26.2 Expert witness reports.....	403
	26.3 Court procedures.....	407
	26.4 Giving evidence.....	408
	26.5 Evidence of fact.....	409
	26.6 Subpoena or other court order.....	410
	26.7 The doctor as a witness.....	410
	26.8 Doctors and jury duty.....	412
	Summary.....	413
27	Medical records, reports and certificates	414
	Introduction.....	414
	27.1 The importance of medical records.....	414
	27.2 What is a medical record?.....	415
	27.3 Guidelines for medical records.....	415
	27.4 The content of medical records.....	416
	27.5 Medical certificates.....	420
	27.6 Electronic medical records.....	422
	27.7 Storage and security of records.....	423
	27.8 Ownership of medical records.....	424
	27.9 Access to medical records.....	425
	27.10 Destruction of medical records.....	428
	Summary.....	428
28	Diagnosing and certifying death and the role of the coroner	430
	Introduction.....	430
	28.1 Responsibilities of the doctor attending a death.....	430
	28.2 What does the coroner do?.....	437
	28.3 Neurological determination of death.....	438
	Summary.....	440

29	Professional practice, digital technology and artificial intelligence	442
	Introduction	442
	29.1 Health records and clinical information systems	443
	29.2 Hybrid health care	448
	29.3 Data, artificial intelligence and personalised health care	456
	29.4 Important considerations	461
	Summary	464
30	Prescribing and administering medicines	468
	Introduction	468
	30.1 Regulatory framework for prescribing	468
	30.2 Prescribing medicines	472
	30.3 Prescribing in particular situations	477
	30.4 Prescribing particular drugs of interest	482
	30.5 Changes in prescribing medicines: a dynamic and challenging area	483
	Summary	484
31	Medical research	487
	Introduction	487
	31.1 The place of clinical research	487
	31.2 Codes of ethics in clinical research	488
	31.3 Research governance	488
	31.4 What constitutes clinical research	489
	31.5 Requirements for ethically acceptable research	490
	31.6 Special areas in medical research	492
	31.7 Standards for responsible research conduct	495
	31.8 Patenting of medical procedures	497
	31.9 Research undertaken in private medical practice	497
	31.10 Misconduct in medical research	498
	31.11 Biomedical research using animals	499
	Summary	499
32	Legal frameworks: rights, responsibilities and protections	502
	Introduction	502
	32.1 Statutory duties	502
	32.2 Medicolegal reports	507
	32.3 Forensic medicine	510
	32.4 General areas of law	511
	Summary	514
33	Entering and leaving practice and practice management	516
	Introduction	516
	33.1 Choosing your career	516
	33.2 Importance of good practice management	517
	33.3 Preparing to enter private practice	518
	33.4 Setting up a medical practice	519
	33.5 Administrative requirements	522

33.6	Selecting, employing and training staff	523
33.7	Marketing and advertising a medical practice	525
33.8	Planning for a healthy approach to work	526
33.9	Closing a medical practice and planning for retirement	526
	Summary	527
	Table of cases	530
	Table of statutes	532
	Index	536
